

ABSTRACT OF THE DISCLOSURE

**APPARATUS AND METHOD OF LINKING SUB-FOLDERS IN A BOOKMARK
FOLDER**

5

A method and apparatus for linking two or more sub-
folders in a bookmark folder together are provided. To link
subfolder A to sub-folder B, a copy of bookmarks stored in
10 sub-folder A is stored into sub-folder B. Thus, when the
content of sub-folder B is displayed, the content of sub-
folder A is also displayed. However, a distinguishing
marker is used to differentiate the bookmarks originally
stored in sub-folder A from those originally stored in sub-
15 folder B.
